***NOTE: Total reduced sulphur consists of 6 substances. Three of these substances (hydrogen sulphide [H₂S], carbon disulphide [CS₂] and carbonyl sulfide [COS]) are also listed individually in the NPRI substance list. If a facility meets the 10 tonne reporting threshold for any of H₂S, CS₂ or COS, it should report total reduced sulphur and the individual substance(s). Therefore, there is a potential for "double counting" of total reduced sulphur and the individual substance(s).
