LHA 70 Cares – Break out group notes

Saturday, January 18, 2014

- Develop an asset map of key stakeholders and resources
- Identify gaps and specific needs
- Prioritize
- Use Sam’s diagram as a tool for prioritizing; is it comprehensive?
- Establish a mechanism for community engagement
- Broaden perspective to include other groups, i.e., children’s health
- Develop vision of how we can move forward with the new client-centred community based health model

~*~*~*~*~*~*~*~*~*~*

“LHA 70 CARES”

1. Investigate disparity of Federal and Provincial Building Codes – reserve and non-reserve
2. Pre and Post Consults done locally. Make it more “person centred”.
3. Share today’s contact information as well as the PowerPoint presentations. Create a repository for information to be available to session participants.

~*~*~*~*~*~*~*~*~*~*

1. Ongoing continuing dialogue and staying connected (ACHN, learning what shared priorities are, sustain the synergy we’ve created, how the ACHN can continue networking).
2. Look at innovative service delivery models and programs.
3. Identify and discuss opportunities: Shared responsibility on priorities (regional) including community members.

~*~*~*~*~*~*~*~*~*~*

1. Distribute the participant list from today to ACHN so that they can update their contact list.
2. Ian and MHSU Island Health staff to connect regarding today’s meeting and the FN Mental Health Forum.
3. ACHN to work with today’s group in continued asset mapping.
