Full Access Closure - High Fire Hazard

Weather conditions are creating a high safety or environmental hazard in all areas of our landbase. To ensure public safety and the protection of the forest, all areas will be closed for non-authorized access. Please respect signs and gates.

Closures will be starting today, **July 11, 2017**, and progressing to full closure by Friday, **July 14, 2017**, and will be effect until further notice.

There are several contributing factors to this action:

- fire hazards are moving into extreme conditions
- no weather changes are in the forecast
- provincial fire fighting resources are allocated to interior fires, possibly limiting fire fighting capacity in other regions

Our blog will have detail on any updates to the closure (<http://blog.islandtimberlands.com/>).

We appreciate the cooperation of all of our neighbors and ask that everyone be aware of the fire hazard and stay safe.

Bill Waugh
Chief Forester
