

Notice to Salmon Beach Residents

Macoah Sewer Project

The Macoah Sewer Project is currently underway and there will be Trucks transiting through Salmon Beach with sand for the project. The majority of sand transport will take place over the next couple of months, middle of March until middle of May, and will continue intermittently until the project's completion in October. Drivers will be respectful of residents and drive slowly through Salmon Beach.

Thank you to Rick Shafer, the Toquaht Wastewater Project Manager, for the notification and the willingness to keep us updated as needed.

Any questions or concerns can be directed to:

Chantel Gemmell
