## NEW PUMP AND HAUL FEES SALMON BEACH

At the July 26th ACRD Board of Directors meeting, the Salmon Beach Sewage Collection fee Amendment Bylaw No F1076-1, 2017 to increase the pump and haul fees to \$120 was adopted.

The issues were discussed with the Salmon Beach Committee at the May 4th meeting, and were presented to the community, which agreed to increase the pump and haul fee.

There are approximately 200 pump and hauls every year in Salmon Beach. During the summer months, the service is in high demand. Should the need arise during emergency maintenance periods for the Salmon Beach pump truck, the use of a contracted pump and haul service will be required to continue this service to owners at an estimated cost of \$3,720 per week. With the current tax requisition near maximum limits for service, an alternate solution was needed to cover the costs in the event of an emergency.

Any unused funds will be allocated as additional capital contribution in the following year. These funds could go towards repairs and/or replacement of the pumper truck.
