Program coverage area

Wildlife activity

Would you like to take part in the volunteer community bin monitoring program?

How?

As you walk around Hitacu, take a quick look at the community bins you pass by.

- ✔ Is the bar up? Is it well latched with the clasps?
- ✔ If it is not, close the bin correctly to make sure crows, black bears or other wildlife cannot access the contents.
- ✔ Once that is done, please text Marianne (WildSafeBC Hitacu-Macoah Coordinator) at 614-622-7317 and indicate the number of the bin that was unlatched.

If you notice any damage or if the bin cannot be closed because of a bent lid or other reasons, please provide those details.

Why participate?

Garbage is a strong attractant for crows and other wildlife species and by taking part in this monitoring program and making sure that the community bins are well latched at all times you can help keep crows wild and the community safer as a result.

Thank you everyone and don't hesitate to get in touch if you have any questions. A clipboard and community bin map will be provided to each volunteer.
