

July 27, 2021

Island Health’s COVID-19 immunization team is returning to your community in August to provide first and second doses to all eligible residents age 12+.

Appointments are required. Please ensure that you are registered in the provincial ‘Get Vaccinated’ system at www.GetVaccinated.gov.bc.ca, and book your appointment when you receive a link. Alternatively, you can call 1-833-838-2323 to reserve your spot. **If you have not received a notice to book your second dose, and you received your first dose more than 28 days ago, please call the number listed above and tell the agent that you live in a whole community clinic location and would like to book your second dose appointment.**

This is the last set of whole community clinics. Island Health is working on a sustainable, accessible program for people who miss this clinic and need first or second dose immunizations in the future. We will share more information about this program in the weeks ahead.
