[CAUTION] This email originated from outside of the ACRD

Dear Board of Directors who are voting this Wednesday 24th on a proposal to legally establish via Section 57 the trails that are currently outside of Maplehurst Park:

Contrary to staff who are apparently, and for lack of foresight and effort, thinking of junking this proposal, I would like to like emphatically counter by registering my support for this proposal. My friends, family, guests and I, are regular visitors and walkers of these trails; and I personally have spent endless days and hours upgrading and maintaining same trails. Please vote to legally establish the trails that are currently outside our Maplehurst Park. Thank you.

Kind regards, Pete

Subject: Maplehurst Park

[CAUTION] This email originated from outside of the ACRD

Mayor Minions and councillor Corbeil, I believe you are our city directors in the ACRD. Director McNabb and Director Bodnar, I believe you are the two directors most impacted by the Maplehurst Trail/Park issue. Director Stere (Tofino), Cole (Ucluelet), and Cote (Sproat Lake), Shannon (Beaufort), I believe because of the respective districts you represent that you recognize the importance of parks and trail systems.

To All:

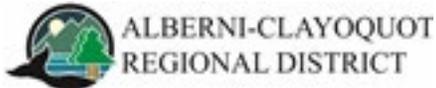

I believe that an important motion, relative to the Maplehurst Trails, is going to be put forth at your ACRD meeting on Aug. 24. Specifically I believe that the motion will provide for official recognition of the trails that currently exist outside the actual park boundary. I very strongly believe that this motion should be supported as a major step to future expansion of park boundaries to include the total trail system. If you have actually walked this wonderful trail system, you will know of the value it offers to the community and district as a whole. To not have walked it, and still vote yes or no, based on a "staff recommendation" is, in my mind, a lack of strong decision making governance.

I trust that you will see the value of a positive decision in support of the motion to officially recognize all the trails that are currently connected to but exist outside the official Maplehurst Park boundary.

Regards, T. Lyman Jardin

[CAUTION] This email originated from outside of the ACRD

I would like to express my strong support the proposal to legally establish protection via Section 57 for the trails outside of Maplehurst Park. I live in Port Alberni and regularly use these trails which are maintained by local volunteers.

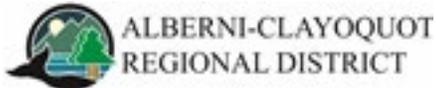

Possible loss of these trails in the future due to lack of action today would show lack of appreciation for the work of the dedicated volunteer maintainers and foresight as to the recreational value for future generations.

[CAUTION] This email originated from outside of the ACRD

Hi,
I have personally done a significant amount of voluntary work in maintaining this trail near the end of Willow Road, and have observed many users taking advantage of this popular trail.
This is a time when people should be taking their exercise locally, to reduce their carbon footprints, as well as enjoying the natural surroundings.
Please vote in favour of legally establishing, via Section 57, the trails outside of Maplehurst Park.
thank you in anticipation,
Trevor Blogg,

Good evening Directors,

I understand you will be considering several requests for decision regarding Maplehurst Park at tomorrow's Regional District Meeting.

I have learned that your staff is recommending against expansion of the trails around the park. As someone who uses the park and surrounding trails several times a week, I am respectfully asking that you consider expanding the trails and the existing trails be protected for continuing community use and enjoyment.

Maplehurst Trail is one of those beautiful natural places which make Port Alberni such a wonderful community to live in.

Sincerely,

Lenore Aspell

Section 57 the trails outside of Maplehurst Park.

I just wanted to add my voice about "too few people would benefit"

If you have ever walked this trail network one would see that it is a very popular trail system. At times it is very congested. It is used mostly by inner city type hikers and dog walkers. It is a great trail so close to town. You can get out into Nature on this short hike very easily. (although multiple access would be great. The area needs to be expanded and no logging permitted anywhere near it.

Best Regards

Mike Brouard. (avid hiker)
