Re: 7956 Pacific Rim Hwy

On request I have attended 7956 Pacific Rim Hwy to confirm the property will accommodate an on-site sewage system for up to 5-bedroom single family home and repair shop with up to 10 employees. During my assessment I have located suitable locations on the property that will meet current regulations to install a type 1 on-site sewage system for the intended flow. If you have any questions or require any further information please call.
