RE: Sewage at 275 Bamfield Boardwalk

In the past year I have visited the upper half of the property at 275 Bamfield Boardwalk. This letter will outline the suitability of septic treatment on the upper half of the property.

My latest visit in September of 2022, I completed a perk test at the lower portion of the lot, where a septic field would be installed. I have worked with Matthew Harmeson, and he has shared a preliminary plan, that outlines three cabins (2 bedrooms each), and one main dwelling (three bedrooms).Based on the perk tests and professional design knowledge it is suitable for several options of wastewater treatment.

Sincerely,

Trevor LaBrash
